SUMMARY

MERN Stack Developer with 6 months of internship experience in designing and developing full-stack web applications using **React.js**, **Node.js**, **Express.js**, and **MongoDB**. Experienced in building **RESTful APIs**, implementing **JWT**-based authentication and **Role-Based Access Control (RBAC)**, optimizing application performance, and contributing to enterprise-level software solutions. Seeking an entry-level Software Developer role to contribute to scalable and impactful applications.

INTERNSHIP EXPERIENCE

Software Engineer Intern

Accelor Microsystems

Jan 2026 – June 2026

- Worked on an existing **ERP system** for a **defense manufacturing company** by restructuring poorly maintained legacy code and enhancing modules supporting the complete product lifecycle from R&D, Production, Inventory, and Quality Assurance to automate manual business processes and improving system maintainability, **optimizing** application **performance** by **20%**.
- Developed a **Visitor Management System** to digitize the complete visitor approval workflow for planned and unplanned visitors, enabling seamless coordination among Security Guards, HR, Hosts, and Visitors through request approval, check-in, meeting tracking, and check-out with secure role-based access, **enhancing** operational **efficiency** by **5%**.
- Built a centralized **Knowledge Portal** enabling Employees, HODs, and Administrators to manage and share organizational knowledge related to Training, Product Learning, Continuous Improvement, Tours, and Technical Documentation, replacing manual knowledge-sharing processes through structured content organization and **reducing** information retrieval **time** by **10%**.

EDUCATION

B.Tech in Information Technology

Guru Nanak Dev Engineering College, Ludhiana Punjab, India

July 2022 – June 2026

CGPA: **9.18**

Higher Secondary Certificate

D.B.S.D Inter College

Feb 2020 – Feb 2022

Percentage: **76.6%**

Secondary School Certificate

BED Narayan H/S Mahammadpur

March 2019– March 2020

Percentage: **80.6%**

PROJECTS

Hosteller Homies (Hostel and Mess Management System)

React.js, Node.js, Express.js, MongoDB

January 2025 – December 2025

- Designed and developed a hostel and mess management system with 8+ roles using **Role-Based Access Control (RBAC)**.
- Automated billing generation, attendance, and mess-off workflows, **reducing** manual administrative **effort** by **10%**.
- Improved room occupancy tracking and complaint resolution modules, **improving** operational **efficiency** by **5%**.
- Implemented daily security guard duty and event fund workflows, **cutting** processing **delays** by **12%**.

News24x7 (News Publishing Platform)

React.js, Node.js, Express.js, MongoDB

June 2024 – December 2024

- Engineered a news publishing platform enabling users to view, upload, rate, and re-view articles with secure authentication.
- Optimized API endpoints, reducing average page load time by **20%**.

SKILLS

Java JavaScript React.js Node.js
Express.js MongoDB MySQL
REST APIs JWT HTML5 CSS3
Tailwind CSS Git GitHub

ACHIEVEMENTS

- Achieved **1st Place** in Phantom Coding Competition at ATHENA 2025 Inter-College Technical Fest (🏆).
- Secured **4th Place** in Next Quantum 2 Hackathon among 40+ teams (🏆).
- Maintained a **9.18 CGPA** while actively managing multiple development projects, showcasing dedication and excellence in academics.
